

MANUAL MATTRESS PACKING MACHINE

MP1000 is a manual mattress packing machine. It is used for packing beds, bases and headboards of different sizes. Thanks to its special mechanical transfer and stick resistance bonding jaw, it provides maintenance-free use for a long time. The problem of wire breakage in wire systems has ended with the use of resistances.

MANUAL MATTRESS PACKING MACHINE

Definition	MP-1000 MANUAL MATTRESS PACKING MACHINE
Production Capacity	150-200 Mattress par day (8 Hours depends on operator speed)
Mattress Size	Any Size of Mattress
Lenght of Resistance	240 cm
Mattress Height	Any Size of Mattress
Micron of Nylon	50 - 250
Compressed Air	6 Bars
Power Requirements	220 V/ 2.5 KW
Dimension	270 cm x 350 cm x 130 cm (W x L x H)
Height of Table	80 cm
Weight	444 Kgs
Required Set - Up Area	3 m x 3 m (W x L)
Required Loading Area	0.7 m x 2.7 m (W x L)
Number of Personnel	1
Quality Standard	CE

- ✓ Double row welding and cutting with nylon cutting blade.
- ✓ Setting welding time
- ✓ Temperature adjustment
- ✓ Long-term maintenance-free bonding system
- ✓ Rod resistance heating system
- ✓ Making a corner cardboard bed
- ✓ Nylon hanger and table
