

MANUAL PILLOW PRESS PACKING MACHINE

PP-1000 Manual pillow press packaging machine is used to pack various pillow-shaped products. The device is simple to operate and has state-of-the-art functionality. It is used to pack different sizes of pillow packaging. The special mechanical design provides maintenance-free sealing with rod resistance and double welding feature. There are no problems such as wire breakage and burning experienced in wire bonding systems and it does not require maintenance for a long time. (2- 3 years)
